

# Independent Data Lab/Omics Chart

- Ongoing actions and developments:
  - Applied for Merck Research Grant 2022 (reached the final round)
  - Currently won Merck SpeedGrant to investigate HRD biomarker in cancer patients
  - In contact with YCombinator (<https://www.ycombinator.com/>)
  - Contact: [tatsiana@omicschart.com](mailto:tatsiana@omicschart.com) or make a direct appointment under <https://calendly.com/tatsiana-omicschart>

# Omics Chart

- building a patient-centered software platform and a data marketplace for precision oncology (<https://www.omicschart.com/>)
- **Vision:** building a **software which can guide cancer patients through their medical records**, engaging them into treatment selection and medical record maintenance. We want to be able to give data ownership back to the patients, and allow them to be active participants in their own health management. At the same time, we would like to use our platform to allow patients the direct participation in clinical research by allowing them to submit the data for research right from our platform, therefore minimizing the time from data generation to clinical research.
- Currently **looking for collaborators who are either interested in performing clinical research on selected population of patients**, and would like to know where such data can be obtained, or collaborators who have a cancer patient database which they are interested in making accessible for scientists worldwide, but at the same time they want to maintain the data privacy.
- always happy to talk to all potential collaborators, patient advocates, hospitals, clinicians, researchers and everyone else who is aiming at delivering precision oncology to cancer patients

# Independent Data Lab

- group of freelance bioinformaticians, Independent Data Lab (<https://www.independentdatalab.com/>), who provide bioinformatics services across all various areas
- For all people in need to expand their bioinformatics capacity
