

SAXOCELL®

Shaping the Future of Medicine

Information Session Wednesday, May 13, 2026 | 3:00–4:00 p.m. | online

A turning point in healthcare

Millions of people worldwide suffer from serious illnesses for which there are often only limited effective treatments. Cell and gene therapies are changing that. They enable targeted treatments—with the potential for greater efficacy and fewer side effects.

Our Mission at SaxoCell

Based in Saxony, SaxoCell is driving the development of these innovative therapies. We connect academia, industry, and clinical practice to bring new approaches to patients more quickly and to improve treatment outcomes in the long term.

Significant progress is possible—but only through strong partnerships.

Invitation to an Online Information Session

Wednesday, May 13, 2026 | 3:00–4:00 p.m.

What to expect:

- Insights into SaxoCell's work and goals
- Discussions with experts and members
- Opportunities to support and get involved
- Time for your questions

Join SaxoCell and help us shape the future of healthcare in Saxony and around the world.

With your support, we can:

- Bring research to practical application more quickly
- Strengthen innovations from Saxony
- Make new therapies available sooner

Your contribution makes a difference—you are actively helping to:

- Create better treatment options
- Reduce side effects
- Actively shape the medicine of the future
